FRIDAY, Dec. 15-6 P. W. There was rather a du'l marke the morning, md we have no particular change i quotations to mport. Virginia 6's advanced i per cent; Erie Railmond, i, and Harlem i. Ill nois Central Bonds fell off i per cent. In all the other fancies ther was no off j per cent. In all the other fancies ther was no variation. The sales were quite hmited. Illinois Contral Bonds sold freely at the dectine in prices. About eighty thousand do'llars worth changed hands at the board this morning. In other railroad bonds there was not much activity. The report of the New York Central Railroad Company has not had may influence upon the market value of the stock. The bears have not lost confidence, and continue to put out short contracts. At the second board prices current at the first board were not sustained. Eric Railroad fell off 2 per cont; Hudson Railroad 2: Illinois Central Bonds 2; seat; Hudson Railroad 1: Illinois Central Bonds 1; New York Central Bonds, 4; Panama Rallroad, 1. Two amail sales of New Jersey Franklinite were made at 3 | a 3 |, which is an advance. The market stored beavy. Wall street was comparatively quiet today. No new back fallures were announced, and there were no unfavorable rumors affect. The steamthip Northern Light arrived this morning with sight hundred thou and dollars in gold and gold dust on freight. Her advices have been azticipated by the arrrival of the Prometheus at New Orleans. After the adjournment of the board, the following

ales of stocks were made at auction :--

named dividend of 4 per cent; the Bowery Savings Bank a dividend at the rate of 5 per cent per an-mem on all sums less than five hundred dollars, and the Central Bank of Brooklyn a semi annual dividend of 4 per cent; the Union Bank of Rochester

in the Welland canal, the great part of which are at Port Dalhousie or near there, and will probably be got out if the weather proves favorable. The amount of grain on these vessels is computed at 185,000

The amount of canal tolls collected at Rother. ser this year was smaller than has been known for years. The amount received in each of the past Tre core was as follows:-1850, \$190,505 10; 1851, \$153.416 92: 1852, \$159.263 53; 1853, \$164.190 25; 1854, \$112,083.

A bill is before the North Carolina Legislature to foregrowth the Charlotte and Wilmington Railroad Sempany, by which a connection is to be formed between Wilmington and Charlotte, via Lumberton, Rockingham, Wadesboro', &c. The capital of the company is to be \$2,400,000; and when individuals shall have subscribed \$800,000 (one-third,) the State is to endorse the bonds of the company for the remaining two-thirds, retaining as security a martgage upon all the effects of the company. The forth Carolina Railroad has just been finished from ad it will be completed to Durhams, Orange county,
To miles from Goldshore, and 28 from Petrick.

The first division of the table shows the line of the laboration of the table shows the line of the laboration of the Goldsboro to Raleigh, and by Christmas it is expectmaking in all 118 miles in operation, and leaving 700 miles to be constructed next year.

We learn that a grant of the most important no. ture has recently been obtained from the government of Mexico for the working of coal and irou nes upon the Pa ific coast. The concession is of The most liberal character, and is an instance of a desire upon the part of that government to develope the resources of their country, which stands in bold relief beside their usual policy. Late discoveries in Mexico have brought to light the existence of extensive beds of the most superior quality of coal and fron immediately uson the Pacific coast, at a point mearly equi-distant between San Francisco and Panama, indicating a source from whence our steam marine in the Pacific can be supplied at less than one balf the present cost. And it is for the purpose of working these valuable deposits upon the most extensive scale that this grant has been procured. Hitherto attention has been turned exclusively to the resources of that country in the precious metals, and the inference has been drawn that in the baser minerals, which are, however, more surely the source of wealth, she was deficient; but so far from such being the fact, the recent discoveries tend to prove the existence of coal and iron to an extent that when developed will have an importance far exceeding her mines of silver, with all their unparalleled richness. The consumption of coal in the Pacific has already reached an extent which at the present enormous cost of delivery there renders it a question of vital importance to the holders of stock is the lines of steamers on that ocean, as well as to all those who feel an interest in placing the means of access to our growing empire in the west at rates more within the reach of all Should coal of a fair quality be found in California or Oregon, it will remain under the disadvantage of high labor too high to render this branch of mining profitable, even at the present price of coal. But Mexico, possessing an abundant supply of labor at rates as low as ic any part of the world, and with a geographical position so favorable-being midway ween the two extreme points of consumption-promises to become, if the reports that reach us are well founded, the great source and centra of the coal trade of the Pacific, and capable of supplying this great and pressing want of our commerce at nich rates as will tend to give renewed impetus to she increase of steam navigation in that ocean. We are glad to notice these signs of progress, and balieve they foreshadow the rapidly approaching period when the North American States will be the great highway of nations, and will command the mmerce of the world.

Tais list comprises thirty banks out of one hundred and thirty nine. The rest are not much better off. One dollar in specie on hand to twenty-five dollars in bills in circulation may do very well for Massachusetts, but it would not do for New York. Our banks have a larger per cent of specie than that, besides securing the bill holders by depo-sits of public securities with the Comptroller. The total circulation of the banks of Massachusetts, ac-cording to the latest returns, amounted to \$15,949,038, based upon \$934,450 of specie on hand, or an average of one dollar in specie to sixteen of circulation.

The imports are not very large, but the supplies are ample enough for the season, and, as there exists but a very limited inquiry for them, prices thereof favor buyers, who show no lactination to operate under present circumstances. The transactions in brown and bleached goods have been quite small, at about former rates. More has been done in cotton flannels, which are scarce and firm. Denims, drills and duck manifest no essential variation. There is increasing inactivity and languor in ginghams, lawns, nankins and osnaburgs. Printing cloths are dull and declining. No important change has occurred in prints. Stripes are in fair request, and steady-licks appear inanimate and depressed. Woolien productions are very sparingly inquired for, and are unsettled in value. The operations in blankets, cas simeres, cloths and doeskins, have been quite limit ed, at ill supported figures. Flannels, jeans and ilnseys are dull and heavy. Mouseline de laines are
not very brisk, but fresh styles are moderately dealt
in at full quotations. Satinets, shawis and tweeds continue to attract very little notice, and are declining in price. Foreign goods are almost totally neglected, so far, at least, as fall purchasers are concerned. There seems to be no life in any other concerned. There seems to be no life in any other place besides the auction rooms, and here it is gradually disappearing. What articles are selling are either of a very desirable style, which buyers pay full prices for, or inferior fabrics, which can be procured at rates which one would be inclined to think sufficiently low to render the purchases effected thereat positive bargains. The spring trade is what operators are now mainly thinking of, and

from the prudent arrangements being made therefor, it is calculated that it will be sufficiently prosperous and profitable to make some return for the nearly ended. August. 48,206 02 244,181 08 292,387 16

Foreign Markets.

ANTHONY AND CO.'S CIRCULAR.

LONDON, Nov. 28, 1854.

Commercial advices from all parts of the world are unlavorable for English manufactures. The import markets are heavy, from excessive supplies. The effect of over production has been more perceptible in our home markets within the past few days. In general all business that has been undertaken within the past year has proved disastrous or unprofitable. In addition to the check given to the unsound speculation, over-trading, and extraordinary high range of prices, brought about by the discovery of Australian and Chilifornian gold, we are suffering from dear food and the slow progress of an expensive and uncertain war.

The bullion in the Bank of England remains unchanged.

Exchequer bills have advanced 2s, the past week.

The exchanges with the Continent are firm at quotations. For China there is a renewed demand for silver. In American securities we have no business to teport. Metal markets are dull. Scotch pig iron has declined to 68s. Rails are dull at £7.

Wheat has further declined 2s, per quarter, and the tendency of prices is downwards.

Retail Prices of Farm Produce at Washing

ton Market.

There has been but little change in the prices of family marketing since last report. Meat, however, has advanced in price. The difficulty between the drovers and butchers, relative to the change of market day has not as yet been settled. The butchers have it will eventually result in having cattle sold every day in the week, instead of on stated occasions, as at present. Vegetables are scarce and dear, as might be expected; potatoas, however, are somewhat cheaper than they were last week. Butter and cheese have fallen in price, but eggs are dearer than ever. This will be bad news to the lovers of pies and pastries. Poultry and game average about the same prices. Apples, as we anticipated last week, have advanced considerably; the supply on band is light. They cannot become much

dearer.	122	1

modation of the officers of the department.

To THE EDITOR OF THE NEW YORK HERALD—
Is Ir—We be g to assure you that it is with much reluctance we feel constrained once more to present ourselves before the public in vindication of our reputation and standing as an organization connected with the
Fire Department of New York. When we are assailed in
a public journal, no other course is left open for our
acoption, but to appeal to the community through the
medium of a like channel, in justification of our conduct
and character; and the invariable fairness which you
have ever exhibited of giving a hearing to both sides,
irduces us to hope that we will not ask at your hands
is vain an opportunity to vindicate ourselves. The lopislature in its wisdom, has made ample provision for
the punishment of slanderous malignity, but the petty
spite which cloaks itself beneath an editorial "we" can
only be adequately dealt with by an exposure in some
widely circulated journal of standing and respectability, wich as the New York Hinarian. In the Mescury of last Sunday, there is a contemptible,
maincious and underhanded attack upon the
members of Hook and Ladder Company No. 11. It is
written under the quise of a sympathising proest
against, or qualification of, what the writer terms
'yoints in relation to Hook and Ladder Company No.

the Mercury, without any signature, and does not care
'yo give this document publicity.'' However, it farhear the about the above accessions contained in
the 'Pointa,'' for we have that preclous document before us, and it certainly is as unline the ordinary form
of communications to public journals as any piece of
paper could well be. The document is written in penui,
without any superscription or address, containing
merely the heads of gross and scurrious charges; it has
all the appearance of memorandis intended as suggestions
to log the memory of one who proposed to write upon a
pre-determined subject, rather than that of an ordinary
communication to a public newepaper. But, six, so 'cr as we are personally concerned, recypting in the renery's
article griving a color to its malignant spirit, we brand as
a low, base and unmitigated falsehood. We had hoped
that in the complete statement—to which you so kindly
gave publicity last week—of the netarious practices of
some parity who has been swindling the community in
our name, an entire and satisfaciery refutation of any
supposed participation in these transactions was therein
contained. We are concerned to observe that nother
the correspondent(?) of the Mercury nor the writer in
that paper appears to be so. If the Mercury's
uponed participation in these transactions was therein
